

1st September, 2025

Dear Valued Customers,

Carbon Footprint Statement

We track and disclose our greenhouse gas (GHG) emissions in accordance with the GHG Protocol. Our Scope 1 (Direct emissions from owned or controlled operations.) emissions are minimal, as we do not own or operate fabrication plants. Scope 2 (Indirect emissions from purchased energy) emissions arise primarily from electricity consumption in our design and office operations. Scope 3 (significant categories of indirect emissions from the supply chain, logistics, and product lifecycle) emissions, which represent the majority of our footprint, are associated with semiconductor manufacturing through foundry partners, OSAT, logistics, and product lifecycle. We are committed to working with our suppliers to measure, reduce, and transparently report these emissions, with the goal of achieving long-term carbon neutrality.
