

F6121

Dual-beam Rx Active Beamforming IC 10.7–12.75 GHz

The F6121 is a 16-ch dual-beam receive active beamforming RFIC designed for application in Ku-Band SATCOM planar phased array antennas. The IC has eight RF input ports, two RF output ports and 16 (8 per beam) phase/amplitude control channels. The eight input ports of the IC may be driven by eight single-polarized elements or four dual-polarized elements of an electronically scanned array (ESA). Each channel has 6-bits of digital phase and gain control resolution spanning 360° and 28dB of dynamic range, enabling precise beam pattern and polarization control.

The IC operates from a single supply of 2.1V–2.5V. When paired with the Renesas F6921 LNA, it achieves a typical cascaded gain of 30dB, while minimizing the front end feed loss due to the flexibility of LNA physical placement near the antenna feeds. The chip includes SPI programmable power management features such as a low power standby mode, independent enable controls on every channel, lower power bias mode and a single-beam operation mode. The device SPI bus and control pins operate from standard 1.8V logic at speeds up to 50MHz. Advanced digital modes and large on-chip memory allow for < 100ns beam position switching times at the array level, greatly reducing dead time and latency.

Finally, the compact and CTE-matched FC-BGA organic package with all single-ended 50Ω matched

RF ports and 0.5mm pitch greatly simplifies the physical integration of these devices onto large antenna panels.

Features

- 10.7–12.75 GHz operation
- Supports 4 dual-pol or 8 single-pol elements
- Two simultaneous and independent beam outputs
- 360° phase control with 6-bit resolution
- 28dB gain control with 0.45dB step size
- 2.3V nominal single supply input
- Standard 1.8V digital logic
- IDAC for external LNA biasing
- Temperature compensation
- Temperature sensor w/ digital readout
- Advanced digital modes with fast beam steering
- On-chip beam-state memory
- 3.8 × 4.6 × 0.9 mm, 63-pin FC-BGA

Applications

- Phased Array Antennas
- Ku-Band SATCOM Terminals
- Aerospace, Maritime & SOTM
